DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Numerals 30, 32, and 34 do not appear in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the wreath rails in claim 12 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 3612

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. Headings as below are needed in the specification.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.

Art Unit: 3612

- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6, 8, 12, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Weber.

Weber discloses the claimed invention including a sidecar having a covering 12 for a reception area capable of being used for mortal remains, such as ashes in an urn. The covering forms an access door when let down. The sidecar includes a bottom

Art Unit: 3612

panel with rollers comprising the wheels of the sidecar. The upper part of the covering has "glazed" portions 20, 22. The door is considered to be a "hatchback" as broadly as recited. The window 20 can be opened to provide cooling means for the vehicle. The frame members 24 and 26 are considered to be "wreath rails" as broadly as recited.

6. Claims 1-4, 6, 8 and 12-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Wood.

Wood discloses the claimed invention including covered areas in the front and the rear of the sidecar. The sidecar includes access door ("hatchback") E through which mortal remains, such as ashes in an urn, may be inserted into the sidecar. Portions of the interior of the sidecar are weatherproof. The sidecar includes a floor portion or deck with rollers comprising the wheels of the sidecar. The opened central portion comprises cooling means. The seat frame is considered to be a "wreath rail" as broadly as recited. There is also a compartment formed below the rear seat cushion as shown in Figure 2. The compartment is capable of holding a miniature coffin or funeral paraphernalia.

7. Claims 1-4, 8-10, and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Headington, Jr.

Headington, Jr. discloses the claimed invention including a sidecar with a refrigerator cooling compartment/reception area (see column 3, lines 55-61). The refrigerator inherently includes a cooling fan to blow air. The refrigerator compartment

Art Unit: 3612

is capable of receiving mortal remains in the form of ashes in an urn. The compartment could also receive a miniature coffin or funeral paraphernalia. It has a deck with rollers

13.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wood.

Wood discloses the claimed invention except for the hatchback E having gas strut assist when opened.

Examiner takes official notice that the use of gas struts for opening assistance for rear vehicle door arrangements is well known in the art.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hatchback of Wood with gas struts which is a notoriously well known opening assistance construction and involves no new or unexpected results in the current instance.

Claim Rejections - 35 USC § 103

10. Claim 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Headington, Jr.

Headington, Jr. discloses the claimed invention except for a light in the refrigerator.

Examiner takes official notice that providing lights in refrigerators is well known. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the refrigerator compartment of Headington, Jr. with lights as a notoriously well known refrigerator feature.
